Manchester Tank to hold ribbon cutting for new Campbellsville plant

Franklin, Tennessee – September 15, 2020 – Manchester Tank & Equipment Co., will officially open its new Campbellsville, Kentucky, plant with a ribbon cutting on September 29, 2020. The event will include plant tours beginning at 10:00 am, with the ribbon cutting ceremony at 12:30 pm. The ceremony will also be streamed live on Facebook.

The 230,000 square foot facility at 901 New Columbia Road will manufacture residential propane tanks ranging in size from 120 to 1,000 gallons, and mid-size pressurized air receivers.

The Campbellsville plant will employ 100 team members by the end of the year. That number is expected to continue growing.

About Manchester Tank & Equipment Co.

Manchester Tank & Equipment Co. has been a trusted industry leader in the design and manufacture of steel and aluminum low-pressure DOT cylinders and ASME pressure vessels for the storage and transport of propane, chemicals, compressed air and other industrial applications since 1946. Manchester's products are used for propane storage, forklifts, fire suppression systems, air compressors, chemical storage and refrigerant systems.
